## Krystexxa (pegloticase)

### PRODUCTS AFFECTED

Krystexxa (pegloticase)

### COVERAGE POLICY

*Coverage for services, procedures, medical devices and drugs are dependent upon benefit eligibility as outlined in the member's specific benefit plan. This Coverage Guideline must be read in its entirety to determine coverage eligibility, if any. This Coverage Guideline provides information related to coverage determinations only and does not imply that a service or treatment is clinically appropriate or inappropriate. The provider and the member are responsible for all decisions regarding the appropriateness of care. Providers should provide Molina Healthcare complete medical rationale when requesting any exceptions to these guidelines.*

#### **Documentation Requirements:**

*Molina Healthcare reserves the right to require that additional documentation be made available as part of its coverage determination; quality improvement; and fraud; waste and abuse prevention processes. Documentation required may include, but is not limited to, patient records, test results and credentials of the provider ordering or performing a drug or service. Molina Healthcare may deny reimbursement or take additional appropriate action if the documentation provided does not support the initial determination that the drugs or services were medically necessary, not investigational or experimental, and otherwise within the scope of benefits afforded to the member, and/or the documentation demonstrates a pattern of billing or other practice that is inappropriate or excessive.*

#### **DIAGNOSIS:**

Chronic Gout

#### **REQUIRED MEDICAL INFORMATION:**

This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. If a drug within this policy receives an updated FDA label within the last 180 days, medical necessity for the member will be reviewed using the updated FDA label information along with state and federal requirements, benefit being administered and formulary preferencing. Coverage will be determined on a case-by case basis until the criteria can be updated through Molina Healthcare, Inc. clinical governance. Additional information may be required on a case-by-case basis to allow for adequate review. When the requested drug product for coverage is dosed by weight, body surface area or other member specific measurement, this data element is required as part of the medical necessity review. The Pharmacy and Therapeutics Committee has determined that the drug benefit shall be a mandatory generic and that generic drugs will be dispensed whenever available.

#### **A. CHRONIC GOUT:**

1. Documented diagnosis of gout  
AND

## Drug and Biologic Coverage Criteria

2. Documentation of ONE of the following:
  - (a) At least 2 gout flares in the previous 12 months  
OR
  - (b) A history of at least 1 gouty tophus  
OR
  - (c) Chronic gouty arthropathy  
AND
3. Documentation of baseline serum uric acid level  $> 6 \text{ mg/dL}$  [DOCUMENTATION REQUIRED]  
AND
4. Documentation of trial and failure, serious side effects or contraindication to TWO of the following for maintenance treatment of gout, at a maximum tolerated dose or an adequate therapeutic dose for 3 months: allopurinol (maximum dose 800 mg/day) OR a probenecid containing medication (e.g., probenecid or probenecid-colchicine) OR febuxostat  
*NOTE: Clinical failure is defined as the inability to maintain serum uric acid (SUA) level  $\leq 6 \text{ mg/dL}$  after reaching the maximum tolerated dose or an adequate therapeutic dose.*  
AND
5. Member will NOT concurrently be receiving other urate lowering therapies such as allopurinol, febuxostat, probenecid, etc.  
AND
6. Prescriber attests that member will be pre-medicated with antihistamines and corticosteroids and closely monitored for anaphylaxis for an appropriate period of time after administration of Krystexxa.  
*NOTE: Anaphylaxis may occur with any infusion, including a first infusion, and generally manifests within 2 hours of the infusion. However, delayed type hypersensitivity reactions have also been reported.*  
AND
7. Prescriber attests to (or the clinical reviewer has found that) the member not having any FDA labeled contraindications that haven't been addressed by the prescriber within the documentation submitted for review [Contraindications to Krystexxa (pegloticase) include: patients with glucose-6-phosphate dehydrogenase (G6PD) deficiency, patients with history of serious hypersensitivity reactions, including anaphylaxis, to Krystexxa or any of its components]

## CONTINUATION OF THERAPY:

### A. CHRONIC GOUT:

1. Adherence to therapy at least 85% of the time as verified by the prescriber or member medication fill history OR adherence less than 85% of the time due to the need for surgery or treatment of an infection, causing temporary discontinuation  
AND
2. Prescriber attests to or clinical reviewer has found no evidence of intolerable adverse effects or drug toxicity  
AND
3. Documented positive response to Krystexxa (pegloticase) treatment, including, but not limited to, reduction in serum uric acid levels compared to baseline or reduction in gout flares [DOCUMENTATION REQUIRED]  
AND
4. The member has not had 2 consecutive uric acid levels  $> 6 \text{ mg/dL}$  while on therapy  
*NOTE: Members with documented serum uric acid concentrations (prior to their next infusion) of greater than 6 mg/dL on more than one occasion during treatment must discontinue treatment with pegloticase. The risk of infusion reaction is higher in members whose uric acid level increases to above 6 mg/dL, particularly when 2 consecutive levels above 6 mg/dL are observed. Monitor serum uric acid levels prior to infusions and consider discontinuing treatment if levels increase to above 6 mg/dL despite treatment.*  
AND
5. The member is NOT concurrently receiving other urate lowering therapies such as allopurinol,

## Drug and Biologic Coverage Criteria

febuxostat, probenecid, etc.

AND

6. Prescriber attests that member will be pre-medicated with antihistamines and corticosteroids and closely monitored for anaphylaxis for an appropriate period of time after administration of Krystexxa.

NOTE: Anaphylaxis may occur with any infusion, and generally manifests within 2 hours of the infusion. However, delayed type hypersensitivity reactions have also been reported.

## DURATION OF APPROVAL:

Initial authorization: 6 months, Continuation of therapy: 12 months

## PRESCRIBER REQUIREMENTS:

Prescribed by or in consultation with a rheumatologist or nephrologist [If prescribed in consultation, consultation notes must be submitted with initial request and reauthorization requests]

## AGE RESTRICTIONS:

18 years of age and older

## QUANTITY:

8mg every 2 weeks

## PLACE OF ADMINISTRATION:

The recommendation is that infused medications in this policy will be for pharmacy or medical benefit coverage administered in a place of service that is a non-hospital facility-based location as per the Molina Health Care Site of Care program.

**Note:** Site of Care Utilization Management Policy applies for Krystexxa (pegloticase). For information on site of care, see [Specialty Medication Administration Site of Care Coverage Criteria \(molinamarketplace.com\)](http://molinamarketplace.com)

## DRUG INFORMATION

### ROUTE OF ADMINISTRATION:

Intravenous

### DRUG CLASS:

Gout Agents

### FDA-APPROVED USES:

Indicated for the treatment of chronic gout in adult patients refractory to conventional therapy.

*Limitations of Use: Krystexxa is not recommended for the treatment of asymptomatic hyperuricemia*

### COMPENDIAL APPROVED OFF-LABELED USES:

None

## APPENDIX

### APPENDIX:

None

## BACKGROUND AND OTHER CONSIDERATIONS

### BACKGROUND:

Pegloticase (Krystexxa™) has been indicated for the treatment of chronic gout in adult members refractory to conventional therapy. Pegloticase (Krystexxa™) is a PEGylated uric acid-specific enzyme that reduces serum uric acid levels by catalyzing the oxidation of uric acid to allantoin. Pegloticase is a PEGylated uric

## Drug and Biologic Coverage Criteria

acid-specific enzyme that consists of recombinant modified mammalian urate oxidase produced by a genetically modified strain of Escherichia coli (Krystexxa prescribing information, 2010). It is approved for the treatment of chronic gout in adult member's refractory to conventional therapy. Krystexxa is not recommended for the treatment of asymptomatic hyperuricemia.

## CONTRAINDICATIONS/EXCLUSIONS/DISCONTINUATION:

All other uses of Krystexxa (pegloticase) are considered experimental/investigational and therefore, will follow Molina's Off- Label policy. Contraindications to Krystexxa (pegloticase) include: Patients with glucose-6-phosphate dehydrogenase (G6PD) deficiency, patients with history of serious hypersensitivity reactions, including anaphylaxis, to Krystexxa or any of its components.

## OTHER SPECIAL CONSIDERATIONS:

Krystexxa (pegloticase) has a black box warning for anaphylaxis and infusion reactions, G6PD deficiency associated hemolysis and methemoglobinemia.

Life threatening hemolytic reactions and methemoglobinemia have been reported with Krystexxa in patients with glucose-6-phosphate dehydrogenase (G6PD) deficiency. Because of the risk of hemolysis and methemoglobinemia, do not administer Krystexxa to patients with G6PD deficiency. Screen patients at risk for G6PD deficiency prior to starting Krystexxa. For example, patients of African, Mediterranean (including Southern European and Middle Eastern), and Southern Asian ancestry are at increased risk for G6PD deficiency.

In Trial 2 and Trial 3 of Krystexxa alone, patients were premedicated with an oral antihistamine, intravenous corticosteroid and acetaminophen.

## CODING/BILLING INFORMATION

**CODING DISCLAIMER.** Codes listed in this policy are for reference purposes only and may not be all-inclusive or applicable for every state or line of business. Deleted codes and codes which are not effective at the time the service is rendered may not be eligible for reimbursement. Listing of a service or device code in this policy does not guarantee coverage. Coverage is determined by the benefit document. Molina adheres to Current Procedural Terminology (CPT®), a registered trademark of the American Medical Association (AMA). All CPT codes and descriptions are copyrighted by the AMA; this information is included for informational purposes only. Providers and facilities are expected to utilize industry-standard coding practices for all submissions. Molina has the right to reject/deny the claim and recover claim payment(s) if it is determined it is not billed appropriately or not a covered benefit. Molina reserves the right to revise this policy as needed.
